Science, Art & Nature
Traveling Exhibitions from the Bell

Engage visitors with natural history exhibitions of all sizes and styles

Share the wonders of our natural world and promote a better understanding of contemporary ecological issues through traveling exhibitions developed and circulated by the Bell Museum of Natural History.

About
The Bell Museum’s popular traveling exhibitions have toured throughout the United States and Canada, offering affordable and flexible exhibition options. While most require gallery installation, several are self-supporting, lightweight and easily assembled. These exhibitions are ideal for bookings in either museum or non-museum settings, such as visitor centers and libraries.

Audubon and the Art of Birds
Explore the amazing beauty and biology of birds through original art and artifacts from the Renaissance to the present day.
3,000 square feet
fee TBD
